

BETTER SURVEILLANCE AND PROTECTION

WITH HIGH PERFORMANCE MOBILE ANPR SOLUTION

ANPR SOLUTIONS

Our mobile solution combines an exceptional accuracy of number plate recognition with the immediacy of possible response. ANPR cameras can be installed in any of your vehicles to allow continuous recognition of number plates of vehicles whilst driving or stationary. The solution checks plates in real-time against pre-defined databases, such as stolen or unregistered vehicles, high emission vehicles, cars with tax or insurance violations, or other vehicles of interest. When a match is made, alerts can be sent within milliseconds of the license plate capture. Notifications can be triggered to multiple systems or devices, while the solution can be securely integrated with external software systems for use in enforcement, payments and security.

"Use of a mobile ANPR systems meant that all of our cars were continuously scanning for missing vehicles regardless of the actual purpose of the trip."

Sam Naughton
Insurance investigator

"In car ANPR helped us easily identify cars that overstayed our three hour parking period and ultimately reduce the problem".

Supermarket Manager

SOPHISTICATED TRACKING

- A single windscreen camera captures up to 3 lanes of traffic in both directions
- Number plates are read and stored alongside GPS coordinates and colour contextual images
- Instant mapping shows where and when vehicles were read for simple visual analysis of data
- Full search capability of historical data with many types of queries
- Black/white lists may be updated manually or wirelessly
- Options to only store data on vehicles of interest

RELIABLE PERFORMANCE

- Ideal for supporting security, monitoring and vehicle location operations
- Data gathering and alerting are fully automatic and require no input or action from the driver
- The captured data is continuously forwarded via 3G/4G and stored on the device whilst offline, ensuring no information is lost
- High accuracy in all weather and lighting conditions

IMMEDIATE DEPLOYMENT

- Cost effective solution that does not require special installation, a separate computer or complicated power management
- Mobile camera is inconspicuous and can be easily transferred from vehicle to vehicle
- Full control and configuration of the system via a tablet or smartphone
- Simple integration into other applications using open interface

ANPRsolutions

ANPRsolutions is a recognized worldwide expert in vehicle management systems enabled by intelligent Automatic Number Plate Recognition (ANPR) cameras and proprietary cloud based backend software. Globally, ANPRsolutions processes millions of vehicle images per day with one of the most reliable and versatile number plate recognition management system in the world.
