

# INTELLIGENT PARKING MANAGEMENT

## COMPREHENSIVE CLOUD BASED ANPR BACKEND

By properly managing your parking with our advanced, cloud based vehicle monitoring solution, you will gain detailed insights into its utilization. As a result, your business will be able to **more efficiently use your limited parking resources**, prevent car park abuse, and **reduce the workload of managing customer and employee traffic**. Notably, your company will provide better service and better security to everyone coming on site.

*"Several companies came to survey the site but then said they simply couldn't provide anything which could perform within constraints. But ANPRsolutions were different – they immediately said that yes, they could cope with our requirements and then went on to demonstrate this extremely well."*

Mike Sixsmith,  
The Oratory School, South Oxfordshire

### COMPREHENSIVE MANAGEMENT

- Detailed searchable intelligence of vehicle movements
- Reports on parking occupancy, overstaying and thoroughfare traffic
- Time based vehicle access lists and physical entrance control
- Intuitive web based interface accessible locally or remotely

### SUPERIOR SECURITY

- Continuous multiple number plate recognition on up to 10 moving vehicles
- High accuracy under any weather and lighting conditions at up to 50 m
- Remote centralised control of unlimited sites
- Multiple control and alert options
- Simultaneous coverage of up to three lanes

### RELIABLE BACKEND

- Full range of analytics, monitoring and automation tools for single or multiple sites
- Remote monitoring and support without on-site maintenance
- Constantly updated software with latest functionality
- Secure encrypted communication and exceptional data protection

ANPRsolutions

ANPRsolutions is a recognized worldwide expert in parking management systems enabled by intelligent Automatic Number Plate Recognition (ANPR) cameras and proprietary cloud based backend software. Globally, ANPRsolutions processes millions of vehicle images per day with one of the most reliable and versatile number plate recognition management system in the world.
